1. Salary & Compensation Policy

Compensation Philosophy

The organization maintains an internally consistent compensation framework based on job scope, skills, experience, performance, market conditions and internal equity.

Base Salary

Base salary is fixed gross monthly compensation before deductions. Annual base salary is calculated as monthly base salary multiplied by twelve.

Salary Reviews

Formal compensation reviews normally occur annually and may consider performance, promotion, market conditions, role expansion and internal equity.

Promotions

Promotion decisions trigger a compensation review against the destination level and require appropriate management and HR approval.

Variable Pay

Eligible employees may receive bonuses or incentives. These are separate from the base salaries listed in this register.

Payroll Cycle

Payroll is processed monthly after validation of employee status, approved salary changes, incentives and deductions.

Confidentiality

Individual salary information is confidential and must be accessed according to role-based authorization.

RBAC

HR administrators may access the complete register. Managers may access authorized departmental or direct-report salary data. Employees may access their own authorized compensation data.

Payroll Corrections

Any discrepancy must be documented, investigated and corrected after verification and approval.
